

MARINE POLLUTION SURVEILLANCE REPORT

Analysis Provided by: The National Oceanic and
Atmospheric Administration/National Environmental
Satellite, Data and Information Service (NOAA/NESDIS)

REPORT DATE: JULY 6, 2011

REPORT TIME: 0045Z (7/5/11 1945 CDT)

ANALYST: SHEFFLER

DATA SOURCE: LANDSAT-7

MODE: ETM+, MULTI-SPECTRAL

RESOLUTION: 30 METER

IMAGE DATE/TIME: 7/5/2011 1627Z (7/5/11 1127 CDT)

Legend

-  Possible Oil
-  False-Positives (not oil)
-  Suspected Point Source:
[44°3'19" N / 87°12'2" W]

REMARKS:

A possible ship dumping of oil can be seen in this Landsat-7 image from earlier today about 20 miles east of Manitowoc, WI. The feature stretches out in a southwest to northeast pattern with several breaks along the line and appears light silver against the dark background of the surrounding waters. A possible point source can be seen about 1.5 miles to the northeast of the approximately 6.5 mile slick, although the direction of the ship seen cannot be inferred from this image.
